

LIFEFILEZ HEALTH PASSPORT

Empowering Our Return to Normal

The LifeFilez Health passport creates a seamless ecosystem for communicating key clinical procedures and results during a pandemic event. Use our iOS and Android native apps or our browser application for displaying verification of, COVID-19 PCR test results (date sensitive), COVID-19 Immunization certificate, and COVID-19 Booster.

HEALTHCARE PROVIDER USE CASE

Healthcare providers need a way to communicate immunization and test results. Our system allows a provider to send test records directly to the individual through the LifeFilez application. Our blockchain integration allows parties to validate that an individual has received a positive or negative COVID-19 test result OR has been immunized.

- Freestanding Clinics and Major Healthcare providers can provide digital results for COVID-19 test directly to individuals.
- Individuals can quickly and easily share required clinical records as needed.

BUSINESS USE CASE

Businesses need a way to validate that it is safe to have individuals (customers, employees, students, etc.) enter their places of business. This is specifically a need in the travel, restaurant and large venue industries.

- Businesses can request and verify COVID-19 protocol compliance of individuals entering their facilities simply by reading a QR code.
- Individuals can share COVID-19 test results or immunization records directly with the requesting party.

CONSUMER USE CASE

Individuals (customers, employees, students, etc.) want to return to "normal". The LifeFilez Health Passport gives the individual immediate access to their Covid-19 test results and Immunization records. Our QR code delivery allows this information to be instantly shared with any party that needs this information.

- Centralized communication with individuals on test results and immunization records.
- Individuals can share COVID-19 test results or immunization records directly with the requesting party.
